

Arne Daniëls - Cosmic Expression & Soul Frequency in Art

Biography

Arne Daniëls (born 1984 in Antwerp, Belgium) is a painter known for cosmic expressionism, a term he uses for his intuitive, free-flowing action painting. A self-taught artist, his multi-faceted practice includes painting, performance, and ceremonial work. During the last few years, he has presented several series publicly in the Antwerp art scene, including Cosmic Energy and Cosmic Stirring.

Vision & Themes

As a meditative explorer, Arne's process opens an interplay between the personal psyche and a greater cosmic spirit. He emphasizes a surrendering place of the mind and a presence of silence. In the state of attention and awareness, a symbolic color palette and titles appear - "Pachamama", "Cerberus", "Atlantis". Each painting stands as a journey of consciousness.

The viewer is invited into a space to decode story, texture, symbol and sacred myth. Arne presents a trace of the soul in the simple and the chaotic - a tantric act, a witnessing of spiritual presence.

Artistic Expression

Daniëls works across multimedia projects and alternative formats - including performances, painting experiences, and ceremonial art. These include live painting, the performance Into the Square, and the film The Artist Makes Love to the Art.

His artistic expression is fluid, energetic, mythic. He invites the viewer into a space beyond meaning - where spontaneity and trust activate creative intelligence.

Collaborations are frequent and emphasized: duo exhibitions, live sessions with dancers and musicians, ceremonial circles. Each experience is a shared exploration of the sacred impulse.

All is Yum.
