

The Golden Age Economy

A Foundational Vision

with The Golden Habitat Flow Model as a Case

by Lars A. Engberg / Blackhole Sunshine

The Golden Age Economy – English Version

1. Introduction

This whitepaper outlines the Golden Habitat Flow Model—an economic and energetic framework for regenerative abundance. It reflects a triune system of sovereignty, planetary service, and cooperative flow.

2. The Three Pillars

1) Lars A. Engberg / Blackhole Sunshine: personal and artistic expression. 2) Planetary Guardians ApS: mission and regenerative funding. 3) Cooperative Association: collective wealth and transparency.

3. Economic Flow

Income flows between the entities via project profits, artistic offerings, crowdfunding, and community funding. A circular system ensures energy and value return to source.

4. Energetic Architecture

Receiving abundance is a devotional act. Stewardship, transparency, and alignment with Source are key to this sacred flow.

5. Implementation

Legal entities: a one-person company for personal revenue, an ApS for PG projects, and a cooperative structure for joint ventures. All should operate with clarity, shared values, and open reporting.

6. Future Expansion

This model can scale and inspire decentralized regenerative hubs globally, based on fractal coherence and shared stewardship.

7. Closing

Abundance flows when love leads. May this habitat serve as a living bridge between spirit and matter.

Den Gyldne Økonomi – Dansk Version

1. Introduktion

Dette whitepaper udfolder Golden Habitat Flow Model – en økonomisk og energetisk arkitektur for regenerativ overflod. Den afspejler et treenigt system af suverænitet, planetarisk tjeneste og kooperativt flow.

2. De Tre Søjler

1) Lars A. Engberg / Blackhole Sunshine: personlig og kunstnerisk udtryk. 2) Planetary Guardians ApS: mission og regenerativ finansiering. 3) Cooperative Association: kollektiv rigdom og gennemsigtighed.

3. Det Økonomiske Flow

Indkomst strømmer mellem enhederne gennem projektoverskud, kunstneriske tilbud, crowdfunding og fællesfinansiering. Et cirkulært system sikrer at energi og værdi vender tilbage til kilden.

4. Den Energetiske Arkitektur

At modtage overflod er en hengiven handling. Forvaltning, gennemsigtighed og alignment med Kilden er nøgler til dette hellige flow.

5. Implementering

Juridiske strukturer: enkeltmandsvirksomhed for personlig indtjening, et ApS til PG-projekter og en kooperativ struktur til fælles initiativer. Alt bør drives med klarhed, fælles værdier og åben rapportering.

6. Fremtidig Udvidelse

Modellen kan opskaleres og inspirere decentrale regenerative hubs globalt, baseret på fraktal samhørighed og delt forvaltning.

7. Afslutning

Overflod strømmer når kærligheden leder. Må denne habitat tjene som en levende bro mellem ånd og stof.
